Policy Statement

We will ensure the safety and well-being of educators, children and visitors, within the Centre and on excursions, through proper care and attention in the event of an incident, injury, illness or trauma. The Centre will endeavor to prevent the event of any incident, injury, trauma or illness occurring through best practice, implementation of all service policies and procedures and by adhering to State and National Laws and risk assessment. Should any of these occur despite prevention measures, the service will make every attempt to ensure sound management of the incident, injury, illness or trauma, to prevent any worsening of the situation. Parents or emergency contacts will be informed immediately where the incident, injury, illness or trauma is deemed serious and all serious incidents will be reported to the relevant authorities as per the National Law and Regulations.

Procedure

Under regulation 161, parents are required to provide written consent for the Approved Provider, Nominated Supervisor or an educator to seek:

- medical treatment for the child from a registered medical practitioner, hospital or ambulance service; and
- transportation of the child by an ambulance service

The above authorisations will be obtained as part of the online enrolment process. Parents will be required to supply the name and contact details of their preferred doctor as well as the child's Medicare number. These will also be recorded as part of the enrolment process.

On Employment, educators will be required to supply a contact number in case they are involved in an emergency or accident.

If a child, staff member or visitor has an accident while at the Centre, they will be attended to immediately by an educator who holds a first aid certificate.

In the case of medication being required in an emergency without prior consent of the parents/guardians, the responsible person on duty is to secure that consent from a registered medical practitioner.

Anyone injured will be kept under adult supervision until they recover or an authorised person takes charge of them.

Meaning of serious incident:

For the purposes of section 174(5) of the Law, the following are prescribed as serious incidents (r12):

- the death of a child while being educated and cared for by an education and care service; or following an incident while being educated and cared for by an education and care service;
- any incident involving serious injury or trauma to, or illness of, a child while being educated and cared for by an education and care service:
 which a reasonable person would consider required urgent medical attention from a registered medical practitioner; or for which the child attended, or ought reasonably to have attended, a hospital;
 Examples Whooping cough, broken limb, anaphylaxis reaction.
- any incident where the attendance of emergency services at the education and care service premises was sought, or ought reasonably to have been sought;
- any circumstance where a child being educated and cared for by an education and care service:
 - appears to be missing or cannot be accounted for; or
 - appears to have been taken or removed from the education and care service premises in a manner that contravenes these Regulations; or
 - is mistakenly locked in or locked out of the education and care service premises or any part of the premises.

In the case of a minor incident, the first aid attendant will:

- Reassure the child
- Assess the injury
- Attend to the injured person and apply first aid as required
- Ensure that disposable gloves are used with any contact with blood or bodily fluids as per the Hygiene Policy, and Illness and Infectious Diseases Policy
- Ensure that all blood or bodily fluids are cleaned up and disposed of in a safe manner as per the Illness and Infectious Diseases Policy
- Ensure that anyone who has come in contact with any blood or fluids wash in warm soapy water
- Record the incident on an Incident/Injury/Trauma / Illness form as per Regulation 87, indicating name and age of child, date, time and location of the incident / injury / trauma, description of the injury and how it occurred including witnesses, treatment given and name and signature of first aid attendant, details of any medical personnel contacted, name and details of any parent or emergency contact notified or attempted to notify (including time and date), time and date of report and name and signature of person making the report.
- If the minor incident involves an injury to the head, parents should be contacted immediately to inform them of the incident. If a major head injury occurs, a concussion is suspected, or a child's demeanour or condition worsens shortly after a head injury, an

ambulance will be called and the parents will be informed. Where the incident / injury / trauma is not considered major or is not a head injury, the parents / authorized nominee will be informed on collection.

- If the Incident / Injury / Trauma / Illness record is already completed, this will be signed off by the parent on collection to confirm knowledge of the incident. If the person collecting the child is not a parent, or the report has not yet been finalized, this will be shared with the parent via email for signature and return.
- The incident / injury / trauma / illness record will be saved away in the designated folder on Sharepoint.

In the case of a major incident requiring more than basic first aid, the first aid attendant will:

- Assess the injury, and decide whether the child needs to be attended to by a doctor or whether an ambulance should be called. The Responsible Person on Duty or Nominated Supervisor will be advised of their decision.
- Attend to the injured person and apply first aid as required.
- Educators will ensure that disposable gloves are used with any contact with blood or bodily fluids as per the hygiene policy, and Illness and Infectious Diseases Policy.
- An educator will stay with the child until suitable help arrives, or further treatment taken.
- The educator will try to make the child comfortable and reassure them and advise that their family has been called.
- If an ambulance is called and the child is taken to hospital, an educator will accompany the child and take the child's medical records with them if the parents / guardians have not yet arrived.
- Complete anIncident/Injury/Trauma/Illness report and report to the Regulatory Authority within 24hrs.

The responsible person on duty will:

- If the child's injury is serious, the first priority is to get immediate medical attention. The ambulance service will be called immediately. Parents/guardians should be notified also, however there will be no delay in organising proper medical treatment. Another educator can keep trying to contact the parents/guardians in the meantime if available.
- Notify the parents or emergency contact person immediately regarding what happened and advise that action is being taken including clear direction of where the child is being taken (i.e. hospital). Every effort will be made not to panic the parents, and provide information in a sensitive manner.
- Ensure that all blood or bodily fluids are cleaned up in a safe manner.
- Ensure that anyone who has come in contact with any blood or fluids is treated as per the Illness and Infectious Diseases Policy.
- Try to reassure the other children and keep them calm, keeping them appropriately informed and away from the injured child.

Incidents which result in serious injury to a child (including death) must be reported to:

- Parents/Guardian
- Regulatory Authority
- The Management Committee

Other Life threatening, traumatic injuries, or the death of a child will also need to be reported to:

- NSW ambulance service
- The police

The Centre will notify the parent/guardian that a serious incident has happened and advise them to contact the relevant medical agency. Only a qualified medical practitioner can declare a person dead and therefore Centre educators should ensure the parents are only advised that the injury is serious and refer them to the medical agency (i.e. Hospital) where the child has been taken. This information should be provided in a calm and extremely sensitive manner.

The site of the incident should not be cleared or any blood or fluids cleaned up until after approval from the Police.

All other children should be removed away from the scene and, if necessary, parents contacted for early collection of children. The children should be reassured and notified only that a serious incident has occurred.

Reporting of Serious Incident, Injury and Trauma

Any serious incident, injury or trauma (including death) will be recorded within 24 hours of the event occurring. The child's parent/guardian must be notified of any incident that has occurred to the child as soon as possible and no later than 24 hours after the event.

The Nominated Supervisor is responsible for ensuring that in the event of a serious incident, the Regulatory Authority is advised, as well as the Approved Provider (Management Committee) and the School Principal.

Notification to the Regulatory Authority of a serious incident is to be made via the NQAITS online portal.

It may not become apparent than an incident was serious until sometime after the incident occurred. If this is the case, the Nominated Supervisor must notify the Regulatory Authority within 24 hours of becoming aware that the incident was serious.

Records of an incident must be kept in a safe and secure location and for the relevant period of time, in accordance with the National Regulations:

• If the record relates to an incident, illness, injury or trauma suffered by a child while under the care of the service, it must be kept until the child is aged 25 years

- If the record relates to an incident, illness, injury or trauma suffered by a child that may have occurred following an incident while under the care of the service, it must be kept until the child is aged 25 years
- If the record relates to the death of a child while under the care of the service, or that may have occurred as a result of an incident while being cared for, it must be kept until the end of 7 years after the death

Regulatory Authority for NSW

Educators will ensure that the NSW Regulatory Authority (see below) is notified of the child's death or of a serious injury / incident / trauma / illness as soon as practicable and within 24 hours, or as soon as the educator hears of the death. This is a requirement under the Education and Care Services Regulations (2011)
